

IF COVID CAN GET THERE,
SO CAN WE.

COVID-19
testing and
vaccines

StemExpress offers full-service mobile COVID-19 support, including PCR testing, vaccines, and monoclonal antibodies administration. Our mobile capabilities offer unprecedented access to communities across the nation, bringing COVID-19 resources straight to where they're needed most.

- COVID-19 PCR testing, with **results in 30 minutes**
- Clinically outfitted to store and administer **COVID-19 vaccines**
- Ability to store and administer **monoclonal antibodies**
- Unit has off-grid ability to run **up to 90 hours** on generator power only
- **Severe weather modifications** allow unit to withstand extreme elements.
- **Disaster WiFi** network designed to reliably pick up a signal, allowing immediate reporting to public health departments and governmental agencies

WE COME
TO YOU!

Protecting the health, safety, and economic vitality of our communities, through state-of-the-art COVID-19 solutions.

Founded in 2010 and headquartered in Sacramento, California, StemExpress is the leading global biospecimen provider of human primary cells, stem cells, bone marrow, cord blood, peripheral blood, and disease-state products. Its products are used for research and development, clinical trials, and commercial production of cell and gene therapies by academic, biotech, diagnostic, pharmaceutical and contract research organizations (CRO's).

StemExpress provides COVID-19 support to frontline workers, inner-city communities, hospitals, skilled nursing facilities, school districts, correctional facilities, tribal territories, and territorial governments, among others.
